Philips Motiva Set-Top Box & Remote

Small, unobtrusive unit connected via the TV. This unit stores vital signs data, provides instructions and displays results in a user friendly manner. This data is shared with the healthcare team to help monitor a user's condition. Educational videos and questionnaires can also be sent through the unit.

Blood Pressure Monitor

For taking daily blood pressure readings which are automatically updated into the Motiva unit.

Body Weight Scales

For taking daily weight measurements which are automatically updated into the Motiva unit. Fluctuations in weight can indicate increased risk.

Pulse Oximeter

Clips over the finger to measure blood oxygen levels and heart rate.

Blood Glucometer

Used to measure blood sugar levels.

Equipment will be supplied according to an individual's long term condition and may not be exactly as shown in the images above.
